

Intelligent operation and maintenance services for industry and the energy sector

Are you looking for a specialized partner for industrial operation and maintenance? Maintpartner exist to help our customers to improve reliability of the plant and minimize process disruptions. We are a safe partner also for all kinds of modification and development projects.

1800 industrial professionals in Finland, Sweden, Poland and Estonia

68 main locations in Northern Europe

3.4 occupational accidents/million working hours (2017); excellent level through consistent efforts

Our versatile services include:

FLEXIBLE PROJECT, INSTALLATION AND ENGINEERING SERVICES

Our 500 experts in engineering, installation and project assignments serve you flexibly whenever you need them.

We take care of, for example, production line relocations, annual maintenance, special installations, manufacturing, and other service and repair work, whether big or small.

ANNUAL MAINTENANCE AGREEMENTS — CAREFREE FOR THE CUSTOMER

More than 800 professionals and the experience of one hundred maintenance partnerships makes us a trustworthy and reliable partner in industrial maintenance.

For each work object, we establish an individual maintenance program according to the customer's wishes.

MODERN, UNIQUE PRODUCTIVITY AND DIGITAL SOLUTIONS

We have developed digital solutions securing that preventive maintenance focuses on right things, the plant operation is optimal and production disturbances are identified and eliminated in advance.

Our tools include e.g. artificial intelligence-based MP INtelligence®, maintenance simulations and dynamic modelling.

THE BEST ENERGY OPERATION KNOW-HOW IN THE NORDICS

We have over 400 operation and maintenance experts in the energy sector who offer the most extensive knowledge in the Nordic countries of power plants, utilizing various types of fuel, as well as of distribution of district heating.

Maintpartner is a leading industrial operation and maintenance company in Northern Europe and the leading expert of the energy sector O&M in the Nordics.

We help to improve the productivity of production facilities and minimise process disruptions. In addition, we offer flexible resources to many types of project, engineering and installation assignments. Digitalisation and our AI-based preventive solutions are becoming increasingly essential for industrial operation and maintenance.

Maintpartner Group employs approximately 1,800 people. Our net sales in 2017 amounted to some EUR 167 million. The Group has offices in Finland, Sweden, Poland and Estonia.
